

Paint Protection Film

A Clear Alternative to Vehicle Bras or Guards

3M™ Paint Protection Film is specially designed to preserve the beauty and integrity of exterior automotive finishes. It is ideal for protecting Class A surfaces in high-wear areas from stone chipping, abrasion and most types of environmental damage. Best of all, it is *virtually invisible*.

Our clear-coated urethane products provide superior appearance, high-gloss finish and resistance to yellowing and staining. Our range of product offerings and sizes provides the best match of protection for your specific applications and requirements. Once applied, according to our application instructions, no special care is required. For best results, professional application is recommended.

Typical applications for protection:

Note: Not approved for use on headlights or windshields because of possible interference with optical clarity.
